| Week 2 (5:45) |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Monday | Tuesday | Wednesday | Thursday | Friday | Saturday | Sunday |
| Rest <br> Rest Day <br> Do some light stretching, yoga or Pilates. Very easy walking is also a good option <br> Feel free to move these rest days around to suit your schedule. There are a couple of rules though! <br> 1. Don't back up hard days/sessions with another hard day/session. <br> 2. If you miss days don't try to make them up by doing two in one day. Just get back on schedule. <br> 01h:00m | Swimming <br> Endurance 100s <br> RPE: 5/10 Moderate Endurance swims are designed to improve your aerobic capacity in the water. They will typically involve multiple repeats between 100 to 500 m with a relatively short rest period. <br> The key to focus on here is maintaining a strong technique and not going too hard early on. You should be aiming to maintain a very consistent pace throughout all intervals and should never feel too out of breath. <br> The endurance swim is often not the most exciting set however is a critical component of improving your ability in the water and its value should not be underestimated. You should focus on smooth rhythmic breathing, feeling the water and keeping your head down. <br> These workouts are a great time to use bilaterral breathing to provide balance to your stroke and enable you to breath to both sides which is a valuable skill to have if you take to the open water. <br> In your warm up include drill work. For example: <br> $2 \times 50 \mathrm{~m}$ easy <br> 25 m skull, 25 m free <br> 25 m kick, 25 m free | Running <br> Easy Run <br> RPE: 3/10 Somewhat Light The pace should be conversational and easy to hold for extended periods of time. Perfect one to do with a friend and chat away! <br> 00h:30m | Rest <br> Rest Day <br> Do some light stretching, yoga or Pilates. Very easy walking is also a good option <br> 01h:00m | Rest <br> Rest Day <br> Do some light stretching, yoga or Pilates. Very easy walking is also a good option <br> 01h:00m | Open Water Swimming Kapiti Women's tri - training day <br> RPE: 6/10 Moderate to Hard 9 am at Raumati Beach for an hour. <br> Each week we'll be swimming and doing a mix of the other disciplines. <br> 28th Jan: Swim session <br> 01h:00m | Cycling <br> Easy Ride <br> RPE: 4/10 Light to Moderate This rides are important for improving your aerobic efficiency, fat oxidation and stamina on the bike. They can also be used to add volume to the week overall without creating too much training stress that would otherwise impact the rest of your sessions. Riding at your an "easy or "endurance" pace should feel relatively comfortable but you will need to focus on keeping some pressure on the pedals throughout the entire ride, particularly on flat and downhill sections. <br> 00h:45m |

| Week 3 (5:50) |  |  |  |  |  |  |

Week 6 (6:10)

| Monday | Tuesday | Wednesday | Thursday | Friday | Saturday | Sunday |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Cycling <br> Endurance Ride <br> RPE: 4/10 Light to Moderate This rides are important for improving your aerobic efficiency, fat oxidation and stamina on the bike. They can also be used to add volume to the week overall without creating too much training stress that would otherwise impact the rest of your sessions. Riding at your an "easy or "endurance" pace should feel relatively comfortable but you will need to focus on keeping some pressure on the pedals throughout the entire ride, particularly on flat and downhill sections. <br> Use this ride to spin out the legs. Resist the urge to push harder and try to increase your fitness this week. You'll only end up tired for event day. | Swimming <br> Continuous <br> swim <br> RPE: 3/10 <br> Somewhat Light <br> A very easy <br> swim. <br> Warm up: 5 <br> minutes <br> alternating <br> slow-fast pacing. <br> Play with <br> different <br> strokes <br> while warming <br> up. <br> Main set: <br> 10-minute <br> steady swim. <br> Swim without <br> stopping. Count your strokes on the first 25 of <br> each 100. Are <br> they staying constant? <br> Cool down: <br> 5 minutes very easy (any stroke) <br> 00h:25m | Rest <br> Rest Day Do some light stretching, yoga or Pilates. Very easy walking is also a good option 01h:00m | Running <br> Easy Run <br> RPE: 3/10 <br> Somewhat Light The pace should be conversationa and easy to hold for extended periods of time. Perfect one to do with a friend and chat away! <br> 00h:20m | Triathlon <br> Event practice <br> RPE: 4/10 Light to Moderate <br> Another mini triathlon today. So all three disciplines in a row if you can to practice your transitions and go over your gear to make sure you have everything you need and everything is in working order for event day. <br> This can also be done on Saturday if you prefer. <br> The effort is light and easy. Resist the urge to push hard if you feel good. Save that energy for the day! <br> Start with a 10-15min (at the most) open water or pool swim. If you are at the beach, practice your entry and exit from the water. Try to do the same course as you'll do on the day, or part of it, to get an idea of where to sight. Add a few shorts bursts of speed once you are properly warmed up. <br> Have your bike gear all ready to go. If you don't have anyone that can watch your gear then set it up in the boot of your car. Again ride for 10-15mins (at the most). Check through your gears and brakes and make sure everything i working properly. <br> Have your run gear all ready to go. Try for a quick transition straight onto the run. But stay relaxed and calm and make sure you practice grabbing everything that you need to - hat, sunglasses, race number etc. Run or run/walk for 10 mins . Add a couple of 10 sec bursts of speed to get the legs turning over (only if you are feeling good). <br> Then go home and set aside all your gear for event day. Wash anything that you need to. You can download a suggested packing list here - https://www.canva.com/design/DAFXOb7kouw/RZaVxelxr4tf1moPZPbYjw/view? utm_content=DAFXOb7kouw\&utm_campaign=designshare\&utm_medium=link\&utm_source=publishsharelink | Rest <br> Rest Day Get everything ready for tomorrow. Check over your gear and your bike to make sure everything is in working order. <br> Go and register! <br> Then try to have a relaxing day and stay of your feet as much as possible to be fresh for tomorrow. | Triathlon <br> Race Day! <br> Event <br> RPE: 9/10 Very <br> Hard <br> Well done on making it to event day! <br> This is an achievement in itself. Don't underestimate or down play this. <br> Injuries, illnesses and other life events can all get in the way so the fact that you made it here is a big deal. <br> Now trust your training and enjoy your event! <br> 02h:00m |
